

Diapers Needed!

96% of families who visit the We Help FRESH Pantry with children ages 0-3 need diaper packs.

How hosting a diaper drive impacts health equity

Social determinants of health are the conditions in which people are born, grow, live, work, and age. They include factors like socioeconomic status, education, housing, employment, and access to healthcare. **Communities that adequately address social determinants of health experience health equity**, wherein no one is “disadvantaged from achieving their potential because of social position or other socially determined circumstances (CDC.gov).”

St. Pete Free Clinic’s programs support health equity for our neighbors in need by providing access to nutritious food, healthcare, and housing for those experiencing housing insecurity and substance use challenges.

Thank you for helping us serve our neighbors in need!

Don't have time to shop, make a donation and we'll do the shopping for you!

We'd also love to receive donations in reusable bags, so we can pass the bag along to a family visiting our FRESH Pantry.
